Incident Status Summary (ICS-209)

Incident: **BALDY**

Narrative:

Fire backing off Baldy Mountain continues. Light rain in the evening decreased fire activity overnight and into the morning.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Light Logging Slash
Timber (Litter and Understory)
Timber (Grass and Understory)**

Narrative:

FM11 mimics heavy dead and down component with closed canopy. FMs TU5 and GS2 from LANDFIRE are being used for modeling.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
There are structures and a residence on the isolated private property to the north and in the community of Cedar Creek. To the south, southeast and southwest are critical Seattle City Light, Bonneville Power Authority (BPA) and PUD transmission lines and fiber optic lines.	E. Single Residences	15	0	0
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	1	0	0

33. Life, Safety, and Health Status/Threat Remarks:

Currently fire is still on USFS, however, fire continues to move toward private inholdings with some structures. ICT2 is working with local authorities for pre-planned evacuation procedures and contingency actions. For public safety, an area closure on USFS lands that includes roads and trails is in effect. Significant firefighter hazards include extensive snags and bug-weakened trees, steep terrain, limited safety zones, rolling debris, reburn potential and indirect fireline. Deliberate Risk Analysis completed, updated and approved.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

A deep upper level trough continued to drift east of the fire today. Enough moisture

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Continued backing fire all flanks with 3 chains expected growth.**

24 hours: **Continued backing fire all flanks with 6 chains expected growth from current size. Switch of the wind direction from the west-northwest will test fire edges and movement.**

48 hours: **Warmer, drier day will increase fire activity, 12 chains expected growth from current size.**

72 hours: **Cooling trend for the weekend will reduce intensity and growth rate. Potential for lightning event late in the weekend.**

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Utilize direct and indirect suppression tactics to engage fire where safely possible to minimize fire duration and long-term firefighter exposure. Use options that balance safety with the highest probability of success to reduce the risk of fire spread to private lands and residences, Cedar Creek community watershed, PUD and BPA transmission lines, and other FERC infrastructure.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Threat of escaped fire due to lack of anchor points, inaccessible terrain and lack of safety zones. Fire is burning in heavy down and dead fuels.**

24 hours: **Threat of escaped fire due to lack of anchor points, inaccessible terrain and lack of safety zones. Fire is burning in heavy down and dead fuels.**

48 hours: **Threat of escaped fire due to open fire line and lack of safety zones.**

72 hours: **Threat of escaped fire due to open fire line and lack of safety zones.**

Anticipated after 72 hours: **Continued threat until burnout operations are complete securing accessible portions of control lines.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **2 Type 1 crews, Type 1 helicopter.**

24 hours: **2 Type 1 crews, Type 1 helicopter.**

48 hours: **2 Type 1 crews, Type 1 helicopter.**

72 hours:

2 Type 1 crews, Type 1 helicopter. Anticipated after 72 hours:																				
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Continued support with the Type 1, Type 2 IA crews and aviation resources enhances our ability to progress establishing anchor points, prepping lines and burn-out operations.																				
41. Planned Actions for Next Operational Period: Attempting to build direct line in A, M, and Q, and monitoring backing fire. Improve right-of-ways and road system for contingency lines.																				
42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”): 900																				
43. Anticipated Incident Containment or Completion Date: 09/30/2015																				
44. Projected Significant Resource Demobilization Start Date:																				
45. Estimated Incident Costs to Date: \$2,200,000.00																				
46. Projected Final Incident Cost Estimate: \$6,500,000.00																				
47. Remarks (or continuation of any blocks above – list block number in notation):																				
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
